

APET tray + APET sealing top film

to make a difference for your food

LONGER SHELF-LIFE

Due to the excellent performances of gas and liquids barrier, the APET System keeps the foods characteristics unaltered for more than 10 days, much longer compared with packaging in PP

BETTER TRANSPARENCY

The perfect clarity and gloss of the **FRESHPLUS-BT**[®] film, combined with the antifog property, guarantee a superior presentation of your food in the pack

EXCELLENT PROCESSABILITY

The APET System offers a good processability in terms of denesting and handling of the trays on the packaging line, both in terms of unrolling and sealability of the top film

COMPLETELY RECYCLABLE

The mono material APET tray can be recycled in the standard PET circuit (as for bottles)

PERFECT TOP SEALING

The excellent mechanical properties and the seal resistance, ensures superior protection and easy working conditions on the packaging lines

T-range

The APET containers range is composed by different sizes and it's available* in several versions:

COLORS

- Cristal clear
- Covering black
- Covering green
- Semitransparent blue
- Semitransparent orange

ABSORBENCY

- Plain bottom
- Absorbent with pad
- Self-absorbent with absorbent cell structure

* The sizes and colors shown are available in stock, can be developed other version on request.

TOP FILM **FRESHPLUS-BT®**

The **FRESHPLUS-BT®** is an APET top-sealing film, suitable for MAP applications to pack fresh food (meat, poultry, fish...)

ANTIFOG

It offers excellent antifog performance even under refrigeration

TRANSPARENCY

It's characterized by high gloss and clarity

HIGH BARRIER

A gas proof top film which guarantees a shelf-life of more than 10 days

LIQUIDPROOF

It ensures the hygiene and the optimal food preservation

EXCELLENT SEALING

it seals even in the presence of contaminations, like fat and liquids
